Highline system overview

Attachment Structures | Primary-system (main) | Secondary-System (Backup) | Personal protective equipment | Structural support Components

- a1 Tree or single structure
- a2 Rock / cliff or structure with multiple attachment points.
- a3 Points (Expansive bolt with hanger, glue in, etc.)

- m1 Main-anchor sling
- m2 Main-line connector
- m3 Tension release system (Soft-Release)
- m4 Main-line webbing locker
- m5 Main-line
- m6 Attachment point connector
- m7 Main & backup rope anchor
- m8 BFK (Big Fat Knot)
- m9 Sewn-loop end of main-line
- m10 Primary intermittent connector
- m11 Leash-ring(s)
- m12 Leash-rope
- m12a Leash-rope to ring connection
- m12b Leash-rope to harness connection

- b1 Backup-anchor sling
- b2 Backup-line connector
- b3 Backup-line webbing locker
- b4 Backup-line
- b5 Sewn-loop end of backup-line
- b6 Secondary intermittent connector.

- p1 Climbing harness

- c1 Abrasion mitigation measures
- c2 Main and backup line joining points (tapes)
- c3 Redirection Structure (A-frame)
- c4 Redirection structure sling and hanging connector.
